DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group A, claim(s) 1-52, drawn to a bus-encrypting mechanism to protect an encryption/decryption process.

Group B, claim(s) 53, drawn to a system of recording encrypted audio visual data specifically with the use of a random number.

The inventions listed as Groups A and B do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group A's special technical feature is the use of bus-encryption to protect a signal between a record and reproduction apparatus and an information process apparatus.

Group B lacks this special technical feature found in Group A. Furthermore Group B, special technical feature is the use of a random number to written onto a recording medium which is used to help protect the medium from being copied.

A telephone call was made to Attorney Lytle on 9-22-08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
